SENAITE

Type: Software Product

General Information

Language: english
splsofAstCit: Enterprise Laboratory System, Laboratory Information Management System (LIMS}
Operating System: Debian, MacOS, Ubuntu
Programming Language: JavaScript, Python
Repository: <https://github.com/senaite>
License: http://www.ebi.ac.uk/swo/license/SWO_1000047
Interoperability: REST
Client: Native
Homepage: <https://www.senaite.com>

Studies

Supports Enterprise Function:

Analysis, Instruments management, Quality control

Offers Features:

Add Analyses, Add Clients, Add global Analysis Specifications, Analysis Categorization, Analysis Profiles, Analysis Templates, Audit Log, Autogenerate Barcodes on Sample Reception, catalog of tests/analyses, Change analyses Properties, Create analysis profiles, create samples, enter results, generate a barcode for sample, generate aliquots from samples, generate partitions from samples, group analyses by type, group samples by projects and/or clients, locating a sample, manage anlyses, out of range analyses, publish the results, quality control tests, receive the sample, remove analyses, result report, roles and groups with different permissions, sample templates, sample workflow, security policies, verify the submitted results, worksheets, samples management
